## Summary

A self-taught young developer from Spain, with a strong passion for coding. For the past 6 years I've been coding websites and apps, managing both frontend and backend and using different coding languages, like html, kotlin, JavaScript and more. In the last couple of years I've expanded my knowledge by doing online courses.

## Projects

### Nasa Asteroid app

Asteroid Radar is an app to view the asteroids detected by NASA that pass near Earth, you can view all the detected asteroids given a period of time with data such as the size, velocity, distance to earth and if they are potentially hazardous.

- **Technology used:**

MVVM architecture, Binding Adapter, Room, LiveData, Navigation, WorkManager, Retrofit, OKhttp, Moshi, picasso, TalkBack, RTL

[https://github.com/chgonzalez9/NASA\\_asteroid](https://github.com/chgonzalez9/NASA_asteroid)

### Location Reminder app

It's a simple To-do List app. The Location reminder will remind users to perform an action when the user is at a specific location with a notification.

- **Technology used:**

Google Maps, Firebase, Geofence, Koin dependencies injection, MVVM, JUnit

<https://github.com/chgonzalez9/LocationReminder>

### Representatives app

A Political Preparedness app that will deliver civic data to end users via the app. Using the Google Civic API you can see your representatives and the upcoming elections.

- **Technology used:**

MVVM, Lifecycle, RecyclerView, Location Service, Google Civic API, OKHttp, Retrofit, Glide, DataBinding, MotionLayout, ROOM

<https://github.com/chgonzalez9/representativesApp>

## Skills

### Android Development

Kotlin, Native Android, MVVM, Google Maps, JUnit, Retrofit, OKHttp, Room, Glide, Koin...

### Web Development

Html5, CSS, Javascript, Wordpress, Bootstrap

### Development Environment

Android Studio, Atom, Visual Studio Code, IntelliJ IDEA, Bootstrap Studio

### Operating System

MacOS, Windows

### Others

Git, Amazon AWS, Firebase

## Education

---

### Android Kotlin Developer Nanodegree by Google

2021 - 2022

[Udacity](#)

- Kotlin language
- Android UI components, Gradle build and Implement data persistence
- MVVM
- Animation with MotionLayout
- Testing

-**Certificate:** <https://confirm.udacity.com/3AZMLLHH>

### C1B3RWALL ACADEMY: Blockchain and Cryptocurrencies

2021

[C1b3rWall](#)

Coordinated by the University of Salamanca and the National Police, It's a course who present and discuss the latest developments in cybersecurity, blockchain technology and everything that converges in the field.

### Android Basics Nanodegree by Google

2020 - 2021

[Udacity](#)

- Java, and XML language
- The basics of object-oriented programming
- Networking in Android, HTTP. JSON parsing and threads

-**Certificate:** <https://graduation.udacity.com/confirm/VLHAKAUN>

### English Academy

2019

[EF International Language Campus](#)

### Web Development

2019

[FreeCodeCamp](#)

- HTML
- CSS
- Javascript

### High School

2011 - 2017

[IES Juan Antonio Zunzunegui](#)

## Language

---

[Spanish](#)

  
Native language

[English](#)

[Basque](#)
