Summary

A self-taught young developer from Spain, with a strong passion for coding. Coding websites and Android Apps for the past 6 years, managing the frontends and backends and using different coding languages, like html, kotlin, JavaScript and more, while also expanding my knowledge by doing online courses.

Skills

Technical Skills

- **Mobile Development:** Kotlin, Native Android, MVVM, Google Maps, JUnit, Retrofit, OKHttp, Room, Glide, Koin...
- **Web Development:** Html5, CSS, Javascript, Wordpress, Bootstrap
- **Development Enviroments:** Android Studio, Atom, Visual Studio Code, IntelliJ IDEA, Bootstrap Studio
- **Others:** Git and Github, Firebase, AWS

Soft Skills

- Critical thinking
- Problem solving
- Team work
- Organization skills

Work experiences

Sous Chef | London

2021 - 2022

Tonkotsu

- Mentoring and training new entries
- Led team while working under pressure
- Flexibility and adaptability to role change
- Daily carrying out manager duties
- Problem-solving

General Service Assistant | Spain

2017 - 2020

Ilunion

- Ability to make independent decisions and judgments on routine procedural issues
- Ability to maintain and manage equipment, machinery, and supplies
- Strong interpersonal and communication skills
- Customer service

Personal Projects

Nasa Asteroid app

Asteroid Radar is an app to view the asteroids passing near Earth, detected by NASA.

Users can view all the detected asteroids given a period of time with data such as the size, velocity, distance to earth and if they are potentially hazardous.

- **Technology used:**

MVVM architecture, Binding Adapter, Room, LiveData, Navigation, WorkManager, Retrofit, OKhttp, Moshi, picasso, TalkBack, RTL

https://github.com/chgonzalez9/NASA_asteroid

Location Reminder app

It's a simple To-do List app. The Location reminder will notify users to perform an action when they are at a specific location.

- **Technology used:**

Google Maps, Firebase, Geofence, Koin dependencies injection, MVVM, JUnit

<https://github.com/chgonzalez9/LocationReminder>

Political Representatives app

A Political Preparedness app that delivers civic data to end users via the app. Using the Google Civic API users can see their representatives and the upcoming elections.

- **Technology used:**

MVVM, Lifecycle, RecyclerView, Location Service, Google Civic API, OKHttp, Retrofit, Glide, DataBinding, MotionLayout, ROOM

<https://github.com/chgonzalez9/representativesApp>

Education

Android Kotlin Developer Nanodegree by Google

2021 - 2022

Udacity

- Kotlin language
- Android UI components, Gradle build and Implement data persistence
- MVVM
- Animation with MotionLayout
- Testing

-Certificate: <https://confirm.udacity.com/3AZMLLHH>

C1B3RWALL ACADEMY: Blockchain and Cryptocurrencies

2021

C1b3rWall

Coordinated by the University of Salamanca and the National Police, It's a course that discusses the latest developments in cybersecurity, blockchain technology and everything that converges in the field.

Android Basics Nanodegree by Google

2020 - 2021

Udacity

- Java, and XML language
- The basics of object-oriented programming
- Networking in Android, HTTP, JSON parsing and threads

-Certificate: <https://graduation.udacity.com/confirm/VLHAKAUN>

English Academy

2019

EF International Language Campus

Web Development

2019

FreeCodeCamp

- HTML
- CSS
- Javascript

High School

2011 - 2017

IES Juan Antonio Zunzunegui

Languages

Spanish

Native speaker

English

Basque

Native speaker
